

SCOTT COFFEN-SMOUT
Senior Research Fellow
IOI-Canada

Scott Coffen-Smout is an oceans management biologist with the Oceans and Coastal Management Division, Fisheries and Oceans Canada (DFO), at the Bedford Institute of Oceanography, Halifax, Nova Scotia. He holds a B.Sc. in Biology and a Graduate Diploma in Marine Affairs from the Faculty of Law, Dalhousie University, and a M.Sc. in Marine Environmental Protection from the School of Ocean Sciences, University of Wales, Bangor, UK. His professional affiliations include being an alumnus of IOI-Canada's oceans management training programme at Dalhousie University, a member of the Ocean Management Research Network, an associate of the Marine & Environmental Law Institute, and co-editor of the *Ocean Yearbook* (with A. Chircop and M.L. McConnell).

Scott has an interdisciplinary background in oceans management and oceans policy research; fisheries development, management and research; shellfish aquaculture development, management and research; and marine affairs project management. This experience includes working in Niue (South Pacific), Somalia and Canada. His current areas of practice at DFO include marine spatial planning, spatial data and information management, sustainable fisheries certifications, oceans management, and area response planning.
