

PAUL BOUDREAU
Senior Research Fellow
IOI-Canada

Paul Boudreau earned his MSc in ecology at Dalhousie University. He is presently retired from a career with the Canadian federal Department of Fisheries and Oceans. He most recently worked in the ACZISC Secretariat as the project manager for the Coastal and Ocean Information Network Atlantic (COINAtlantic). The COINAtlantic project is an initiative working to improve the links between existing internet technologies, available on-line information and the people who are involved in coastal and oceans management.

Mr Boudreau has worked on a number of issues during his career including:

- research on habitat and population production in freshwater, estuarine, and marine ecosystems;
- environmental impact assessment; and,
- mapping of marine benthic habitats.

He has held numerous committee positions including membership on:

- ICES Working Group on Marine Habitat Mapping; and,
- U.S. National Academy of Science Committee on National Needs for Coastal Mapping and Charting.

He worked for three years at a global change project office in The Netherlands looking at the flux of materials from land, through the coastal zone into the coastal oceans. Much of his work has involved building stronger links between science and managers.
